

# Introducing the New PROSTAR® 1200 lb. MIG Welding Wire PAC

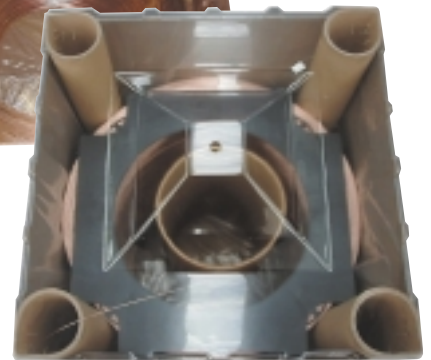

*Premium quality, twist-free, robotic welding wire combined with innovative packaging and reliable service maximize downtime savings!*

PAC 1200

PROSTAR® twist-free, robotic welding wire provides the best and most logical solution for fabricators who need to achieve the highest level of productivity and efficiency in their robotic and automatic welding operations. Due to its excellent feedability, this wire minimizes burn-backs and birdnesting, and helps eliminate arc wander. It also minimizes weld defects due to off-seam tracking and improves weld consistency.

Each PAC 1200 undergoes strict quality control inspections throughout the manufacturing process to eliminate criss-crossed wire strands, wire surface defects, or other feeding problems.

**1 PAC 1200 = 27 (44 lb.) Spools**

Experience indicates the downtime per spool change is 15 minutes.  
1200 lbs. = 7 hours of downtime savings.

Wire quantity indicator.

Double stacking design reduces storage space required.

Forklift can access the skid from all sides.

## *Rely On Consistent Quality Welds!*

*Trouble-free wire feeding.*

*Consistent wire quality from one PAC 1200 to the next.*

*Clean wire eliminates liner and contact tip contamination.*

*Raw materials are sourced from certified suppliers and meet tight quality parameters.*

*The quality manufacturing system was recently certified to the standard: ISO 9001 : 2000*

# Advantages Of The PROSTAR® PAC 1200

*Unique corner supports prevent box deformation.*

*Center cone ensures smooth wire feeding.*

*Unique square shape design prevents snagging of the wire.*

*Each PAC 1200 includes a disposable plastic dome which allows visual inspection of the wire contents at all times.*

*Double stacking design reduces storage space required.*

*Forklift can access the pallet from all sides.*

*Wire quantity indicator at the bottom of each PAC.*

*PAC 1200 components are easy to recycle. No drum disposal problems.*
