Hydrogen

2004 Global Sales - $690 MM

North America
- Strong demand from refiners
- 310 miles of pipeline on US Gulf Coast, with production capacity of 600 MMSCFD
- Significant growth areas outside of Gulf Coast

Europe
- Hydrogen production in Italy and Spain
- Sulfur reductions in fuels scheduled for 2009

China
- Caojing hydrogen plant start-up in 2005

2005 Sales forecast to approach $900 MM and expected to grow 20% p.a. through 2010
North America – Hydrogen Growth Drivers

- Low sulfur fuel regulations
- Strong demand for gasoline and diesel
- Heavy crude upgrading
- Outsourcing hydrogen supply
- Upgrading hydrogen production technology
- Canadian synthetic crude
  - Upgrading bitumen
  - Refining

Expect several additional SMR’s to be sited in 2005

PEMEX Enhanced Oil Recovery Project

PEMEX Samaria Oil Fields

- PEMEX’s main source of light crude
- Current production approx. 150 MBPD
- Production has declined from 1979 peak of 600 MBPD
- N₂ injection and new wells expected to recover additional 470 MM barrels of oil and 540 BCF of natural gas through 2018

Praxair

- 15 year Take or Pay contract
- >6500 TPD of nitrogen production
- Delivered via pipeline to multiple injection wells
- Start-up Q1 2007

Why Praxair?

- Strong, sustainable, organic growth
- Diverse end markets and applications technology
- High return on capital
- Long term customer retention
- Substantial free cash flow generation
- Capital and operating discipline
- Strong corporate governance
Principles of Sustainability

**Governance and Integrity**
Foster a culture of integrity and accountability throughout the company through rigorous compliance with all laws, and by establishing and following effective corporate governance practices.

**Customer Commitment**
Continuously develop new products and applications that help our customers improve their productivity, energy efficiency and environmental performance. Provide the highest levels of service, reliability and quality to our customers.

**Environmental Responsibility**
Continue to improve the efficiency of energy consumption. Reduce the intensity\(^1\) of air emissions, including greenhouse gases.

**Employee Safety and Development**
Maintain a safe work environment with a goal of zero accidents. Provide training and career opportunities that allow employees to develop to their fullest potential. Increase the diversity of our workforce so that it is more representative of the communities in which we operate.

**Community Support**
Help to improve the welfare and future of the communities in which we operate by sharing our knowledge, expertise and resources related to environmental protection, and community health, safety and security.

**Financial Performance**
Continuously improve our financial performance and provide attractive returns to our shareholders. Generate operating cash flow to reinvest in business growth and pay dividends.

\(^1\)Intensity is per-unit-of-production measure
