Forward Looking Statement

This document contains “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. These statements are based on management’s reasonable expectations and assumptions as of the date the statements are made but involve risks and uncertainties. These risks and uncertainties include, without limitation: the performance of stock markets generally; developments in worldwide and national economies and other international events and circumstances; changes in foreign currencies and in interest rates; the cost and availability of electric power, natural gas and other raw materials; the ability to achieve price increases to offset cost increases; catastrophic events including natural disasters, epidemics and acts of war and terrorism; the ability to attract, hire, and retain qualified personnel; the impact of changes in financial accounting standards; the impact of changes in pension plan liabilities; the impact of tax, environmental, healthcare and other legislation and government regulation in jurisdictions in which the company operates; the cost and outcomes of investigations, litigation and regulatory proceedings; continued timely development and market acceptance of new products and applications; the impact of competitive products and pricing; future financial and operating performance of major customers and industries served; the impact of information technology system failures, network disruptions and breaches in data security; and the effectiveness and speed of integrating new acquisitions into the business. These risks and uncertainties may cause actual future results or circumstances to differ materially from the projections or estimates contained in the forward-looking statements. Additionally, financial projections or estimates exclude the impact of special items which the company believes are not indicative of ongoing business performance. The company assumes no obligation to update or provide revisions to any forward-looking statement in response to changing circumstances.

The above listed risks and uncertainties are further described in Item 1A (Risk Factors) in the company’s Form 10-K and 10-Q reports filed with the SEC which should be reviewed carefully. Please consider the company’s forward-looking statements in light of those risks.
Praxair Snapshot

Industrial Gases
- Critical to customer; small part of their cost
- Local production and distribution
- Long-term contracts

Praxair Industry-Leading Results
- Operating margin 23%
- Return on capital 13%
- Operating cash flow 25% of sales

2015 Sales

By Segment
- North America 55%
- Europe 12%
- South America 13%
- Asia 14%
- PST 6%

By Supply Mode
- Merchant 34%
- Packaged Gases 28%
- On-Site 29%
- Other 9%

By End-Market
- Manufacturing 24%
- Metals 17%
- Energy 13%
- Aerospace 3%
- Chemicals 10%
- Food / Bev 8%
- Healthcare 8%
- Other 8%
- Electronics 8%

Praxair Performance Drivers
- Diverse end-markets
- Integrated supply model
- Select geographic footprint, largest in Americas
- Disciplined investments drive density & returns
- Growth and margin expansion
- Consistently strong cash flow generation and disciplined capital allocation

Continuous improvement… resilient cash flow… accretive recovery

Praxair 2015 operating margin and return on capital are non-GAAP measures; refer to 12/31/15 Form 10-K for reconciliations.
Diverse End-Markets and the Gases We Supply

**Manufacturing**
- Cutting
- Welding
- Glass
- Automotive

24%

**Metals**
- Steel production
- Stainless steel
- Metal finishing / coating
- Inerting

17%

**Energy**
- Refining
- Natural gas fracking
- Enhanced oil recovery
- LNG in Brazil

13%

**Chemicals**
- Production
- Coal gasification
- Syngas production
- Process control

10%

**Food & Bev**
- Carbonation
- Freezing
- Inerting
- Aquaculture

9%

**Electronics**
- Semiconductor
- Photovoltaics
- Flat Panel

8%

**Healthcare**
- Hospitals
- MRI
- Anesthesia

8%

**Gases**
- Atmospheric: $O_2$, $N_2$, $Ar$
- Process: $H_2$, $He$, $CO_2$, $CO$
- Rare: Xe, Kr, Ne
- Spec Gases: $N_2O$, $SiH_4$, High Purity, Blends
