

# In-Use Storage and Handling of Large Cylinders – Streamlined

*Time saving, easy to load, easy to move carts minimize in-room footprint for large cylinders*

The new Praxair Medipure™-LC Single and Dual Cylinder Carts makes having cylinders ready to go at the point of care easier than ever. Available in either a two cylinder or a single cylinder format, these advanced carts allowing right storage of cylinders and reducing cylinder footprint in the ER or ICU areas. Medipure-LC Series carts improve cylinder handling and make in-room storage more functional and aesthetically pleasing.

Features	Benefits
<b>Single and Dual Cylinder Design</b>	Your choice of formats to maximize cylinder storage volumes and footprint to match your space constraints
<b>Vertical Storage Cylinder Position</b>	Replaces traditional tube-metal cylinder carts which require storage of cylinders at an angle for stability
<b>Accessory Baskets</b>	Store hoses, vinyls and other items in a neat ready-to-use basket Eliminates the need to ‘hang’ items from the cylinder and connections
<b>Sturdy Construction</b>	Robust design facilitates storage of ‘K/H,’ ‘T,’ or ‘6K’ cylinders
<b>Smooth Easy Wipe-Down Surfaces</b>	Smooth surfaces make it easier to facilitate care and cleaning to help maintain cleanliness in patient care areas
<b>Easy Lift Mechanism</b>	Crank-type design reduces the effort required get cylinders into a position that’s ready for transport
<b>Locking Wheels</b>	The cart is effectively held into position
<b>IV Pole Mount</b>	Mount gas conditioning and other devices required for patient care and maximize space utilization
<b>Optional Cylinder mounting bracket for portable gas cylinders*</b>	Portable medical gas cylinders in ‘D’ and ‘E’ size can be mounted when required for transport

\*Available for Single Cylinder Cart only
